FINANCIAL SERVICES

Full job description

Your new company

This Big 4 Consultancy firm are interested to hear from reliable, organised and hard-working individuals to join their calculations team, working on a financial services remediation project based at their financial services clients. These teams will work in a target-driven environment where being able to work with a high level of accuracy to prescribed processes and to strict deadlines is a prerequisite. The teams are primarily dedicated to assisting financial institutions with their issues in respect of financial instruments with a specific focus on valuations and quantification of financial consequences as a result of inappropriate financial advice. The role may also require the design and development of ad-hoc tools on behalf of our clients to deliver complex calculations.

Your new role

A Calculations Officer will be required to:

- Understand a calculation methodology used to compensate customer issues
- Take ownership of the collation the financial information relevant to producing the calculation
- A thorough understanding of finance and the ability to problem-solve
- Prioritise daily personal workload to ensure a high quality deliverable is
